Portfolio: https://nerea-portfolio.vercel.app/en

Hello! I'm Nerea, a Digital Designer and Front-end Developer. I am passionate about creating people-centred digital experiences, combining creativity, aesthetic sensitivity and a functional approach. I consider myself enthusiastic, consistent and proactive, with a great capacity for learning and adapting to new challenges and technologies.

My professional career ranges from visual design to technical implementation. I recently completed an internship at Bizzart Cooperativa Sociale (Italy) as a graphic and UX/UI designer, where I strengthened my autonomy and problem-solving skills. Previously, I worked at Fidenet Comunicación as a front-end developer and web layout designer, consolidating my technical skills and collaborating closely with multidisciplinary teams.

I am currently looking for an opportunity to continue growing in the design and development of digital products, adding value through research, design and strategy. I am interested in joining a company committed to sustainability, equal opportunities and collaborative work. You can view my personal portfolio at the following link: https://nerea-portfolio.vercel.app/en

EDUCATION

2021-2023
AEG Escuela de Innovación Profesional
Senior Technician in Web Application Development

During this formation I had the opportunity to increase my knowledge in the field of programming, web layout and project deployment. This way, I learned skills that would be useful for my professional career.

2017-2021
IED KUNSTHAL BILBAO
Degree in Higher Artistic Design Education in the specialty of Graphic Design

During the four years of my degree, I had the opportunity to learn from great graphic design professionals. In addition, I was able to develop my skills in different areas of graphic design such as branding, signage design, web prototyping or layout design.

EXPERIENCE

15/01/2025 - 11/07/2025 - Vicenza, Veneto (Italy)
Graphic and UX/UI Designer at Bizzart Cooperativa Sociale.

I designed visual content, such as posters for events, presentations, logos for projects and social media. I also created various websites using WordPress. In addition, I participated in the creation of different visual aids for a cultural event through painting.

26/06/2023 - 05/12/2024 - Donostia (Gipuzkoa)
Junior Developer in Fidenet Comunicación.

I participated as a support in development projects, performing functions as a front-end developer. I designed and managed websites using WordPress as the main CMS, and collaborated as a layout designer and developer in the content management project for the Caja Navarra Foundation.

2022/07/15 - 2023/06/14 - Donostia (Gipuzkoa)
Work-linked training contract in the company Fidenet Communication.

I started designing and prototyping interfaces in Figma, focusing on usability and user experience. Little by little, I shifted my profile towards front-end development, leaving visual tasks in the background to focus on layout and technical implementation.

PROFESSIONAL SKILLS

Language skills:
- **Mother tounges:** Basque and Spanish.
- **Other languages:** English (B2 - FCE) and Italian (beginner).
